The Cost-Conscious Line

of Universal Appeal—

Mastercrafted in WOOD

The Line With The National Reputation

National Kitchens

Give You Unmatched Visual Appeal and Utility

The line with **LUSTERITE®***
non-warping doors
that need no maintenance

Here is a complete line for designing a kitchen of any size, shape or form—for homes in any price range—despite the fact that **NATIONAL KITCHEN CABINETS** are priced competitively low to permit the pacesetter builder to endow his homes with incredible appeal for women.

NATIONAL KITCHEN CABINETS were designed by home planning experts with many years' experience in supplying the building trade. The designs, treatment and finish are exclusively **NATIONAL KITCHENS'**.

No one else in the field has matched the distinctiveness, the beauty and the efficiency of operation that these cabinets incorporate. Because buyers have more experience in evaluating new homes, you need the tremendous sales appeal of **NATIONAL KITCHENS** to set your homes years ahead in styling from your competitors.

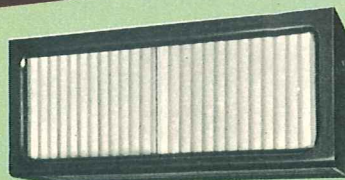

Beautiful penetrating walnut stain covered with high grade furniture lacquer. No unsightly hardware! All sliding doors are made of **LUSTERITE** that catches and reflects light, adding unusual tone and charm to the kitchen. **LUSTERITE** panels are especially and exclusively made for this line alone. They slide easily and silently on a hard wood weber-edge track.

For unmatched working efficiency all counter work surfaces are available in Formica, in a complete range of color and pattern selections.

NATIONAL KITCHEN CABINETS are planned to be installed easily and swiftly, and can be serviced with little effort. This cuts installation time and costs to a minimum, enabling you to effect economies never before possible.

**Corrugated fiber glass panels with textured crinkle finish.*
